

# SwiftCloud

Are you ready to **futureproof**  
your B2B ordering?

# Introducing nine powerful B2B modules to digitise your business

The unrivalled B2B ordering SAAS platform - specifically developed for wholesalers, manufacturers and suppliers. With nine powerful modules designed to revolutionise your B2B ordering processes, seamlessly integrating with your existing ERP system, supporting the most complex of orders.

# 1

## SwiftCloud B2B Mobile App

### Designed for B2B ordering, and built around you!

Branded with your company logo, colours, and imagery the SwiftCloud App is designed to encourage ordering and increase both ease and enjoyment of the customer journey. Your company App will be available for your customers to download in the App Store or in Google Play.

# 2

## SwiftCloud Web Portal

### All the features of the B2B Mobile App on Desktop!

The SwiftCloud Web Portal is the perfect solution for those customers who prefer to order via a desktop computer or laptop. The Web Portal automatically syncs with your SwiftCloud App, your ERP system and any other SwiftCloud modules you may want to add-on.

3

## The **SwiftCloud** Sales Manager App

Boost your Sales Managers productivity with the SwiftCloud Sales Manager App. The ultimate tool for Sales Managers, whether dealing with accounts internally or out in the field.

**Customer Onboarding**

**Price Override**

**Meeting Notes**

**Send & Share Files**

4

## The **SwiftCloud** Email Ordering

SwiftCloud Email Ordering uses the latest technology to read orders sent via email and place them in your back-end system with minimal fuss.

**Email to ERP**

**Complete Integration**

**Secure Software**

**Eradicate Error**

5

## The **SwiftCloud** Telesales Portal

The process of inputting orders via telephone can sometimes be slow or cumbersome. The SwiftCloud Telesales Portal will ensure that your sales team are working to the best of their ability with our lightning-fast digital order input.

**Fast Order Entry**

**Time Saving**

**Accessible Anywhere**

**Account Management**

6

## The **SwiftCloud** B2C Mobile App

Sell directly to the end user with the SwiftCloud B2C App. Available as an add on to the SwiftCloud B2B ordering App or as a stand-alone platform. If you're already selling to the trade, you can now unlock the ability to sell to both businesses and the end user utilising one unbeatable, custom branded B2C App.

**24/7 Ordering**

**Fast Payment**

**Offers & Promotions**

**Fast Ordering**

7

## SwiftCloud Push Notifications

SwiftCloud Push Notifications give your business complete control of any communications sent out to your customers. Information which is relayed within a Push Notification is completely customisable. Perfect for informing your customers about any special offers, new stock or seasonal promotions.

Inactivity sequences can also be created which would automatically trigger a notification to be sent to a specific customer device if the app hasn't been opened for a specified amount of time.

8

## SwiftCloud PO Authorisation

SwiftCloud PO Authorisation allows you to have a set of values in place before orders have to be approved. For example, if orders large in value size need approval, a limit such as £100 can be set. This is ideal for businesses which insist on large value orders being processed by management.

Alternatively if all orders need approval before processing, the limit can be set at a default of £0.

9

## SwiftCloud Quotation Module

Customers can build an order using the simple SwiftCloud interface, then, rather than check out as usual, the customer can request a quote. Once the quote has been requested, the supplier can update and edit the quoted price. Quotes will then be sent directly back to the customer for rejection or approval, before the order is processed.

# Why SwiftCloud?

SwiftCloud is the market leading B2B ordering platform specifically designed for wholesalers, manufacturers, and suppliers. Packed full of impressive features, SwiftCloud now presents nine powerful modules all built with industry trading in mind, designed to increase your order value, order volume and the user experience for your customers.

*"The SwiftCloud app has given us better visibility and less manual intervention in the ordering process which has helped to increase the accuracy and frequency of customer orders"*

**STAEDTLER**

*"Orders placed through SwiftCloud are 10% higher in average order value than orders placed using other methods"*

**AG Barr**

*"There has been an 80% compound growth in customers engaging with the app and a 26% increase in the number of orders placed!"*

**Bako North Western**
