Made for Users, NOT Technical Experts

- **Eliminate the technical bottleneck of non-cloud reporting solutions** by leveraging optimized Business Central data in a modern, user-friendly interface built for everyone.
- **Easily create and customize pre-built reports** and pull accurate data from anywhere without worrying about the underlying data structure.
- **Access everything you need in one place** with the Cosmos Portal, where you can manage existing reports, run reporting queries, update users and permissions, edit your data model, and more.

One Unified Secure Cloud Platform

- **Minimize administration efforts** by leaning on a single, cloud-based data platform that handles your reporting, analytics, and data governance all in one solution.
- **Seamlessly integrate your existing Microsoft environment** and login using your Microsoft credentials.
- **Capitalize on the speed, security, and scalability** of a cloud platform powered by Microsoft Azure that will adapt and fit your needs for the life of your business.

Instant Value - 30 Reports in 30 Minutes

- **Experience turnkey success from day one** with simplified data migration, effortless installation, and quick user adoption.
- **Start building reports immediately** with access to 30 pre-built, fully customizable Business Central reports directly out-of-the-box.
- **Make data-decisions at the speed of business** by running unlimited simultaneous reports and queries quickly without tying up Excel or other business applications.

True Power BI Integration

- **Seamless two-way integration** lets users access their Cosmos Data Model from within Power BI while also displaying Power BI Workspaces directly inside Cosmos.
- **Give your users the power** to create dashboards and data visualizations in seconds from directly inside a familiar, intuitive reporting tool – without SQL or DAX expertise.
- **Increase revenue and reduce costs** with a complete view of business performance through robust, analytical dashboards and visual reports.
